

✓ Seamless Solutions

## Engineered Systems

W-Industries specializes in custom designing and fabricating a variety of engineered packages for a broad range of applications in the energy industry.

As the energy sector continues to rapidly evolve in complexity, so does the need for new, lean, agile, and innovative approaches for high-assurance, resilient, and adaptive engineered systems. Designers and manufacturers must also account for system vulnerabilities and integration with obsolete technologies.

W-Industries recognizes that there is no one-size-fits-all solution for these complex system challenges. We specialize in custom designing and fabricating a variety of engineered packages for a broad range of applications in the energy industry.

From single pump installations to complete offshore modules, W-Industries supports each project with a level of expertise that only comes from experience and commitment to craftsmanship. Our strict attention to detail along the entire supply chain paired with our expertise in system integration enables us to foresee and address design related issues that could arise during the execution stage of the project. We pride ourselves on providing systems that yield optimal operational performance.

## Capabilities

## Why W-Industries?

- Integrated approach streamlines processes, reduces risk, and aligns complementary technologies
- Offerings span the entire life cycle from concept to commissioning and beyond
- One quarter of W-Industries' team is made up of engineers that play a role in every step of our process
- Every concept and design is fabricated and comes to life in our global offices and combined manufacturing and fabrication spaces
- Each solution is tailored and customized for every individual project

### LOCATIONS

W-Industries Headquarters - Houston, TX  
 W-Industries Thora Lane - Houston, TX  
 W-Industries - Pearsall, TX  
 W-Industries - Pecos, TX

W-Industries - Maurice, LA  
 CCA - Corpus Christi, TX  
 GCPC - Sulphur, LA  
 Volta - Houston, TX
