

Why Choose **W-INDUSTRIES?**

Thermography

INSPECTIONS

- Electrical – fulfill PM requirements, identify distribution concerns, maximize efficiency and minimize unexpected down time.
- Mechanical – identify increased bearing temperatures, heat losses through insulation, and early detection of grounding leakage.
- Commissioning – verify proper installation, termination, and operation of new equipment before it is put into production.

REPORTING

- Comprehensive reports configured to each customer's requirements.
- Consultation and transparent summary of our findings and the potential implications.
- Coordinate with facility staff on solutions and implementation.

SERVICE

- Seamless hand off to our service technicians to address issues discovered during inspections.
- Improve system performance, reliability and efficiency.

W-Industries' Electrification Division designs, manufactures and delivers highly complex systems for distribution and control of electrical energy and other critical processes, including medium voltage/low voltage switchgear and motor control equipment. These components are often then integrated into Electrical Equipment Centers (EECs), providing customers the flexibility of custom design and reduced delivery time.

LOCATIONS:

W-Industries - Corporate Headquarters

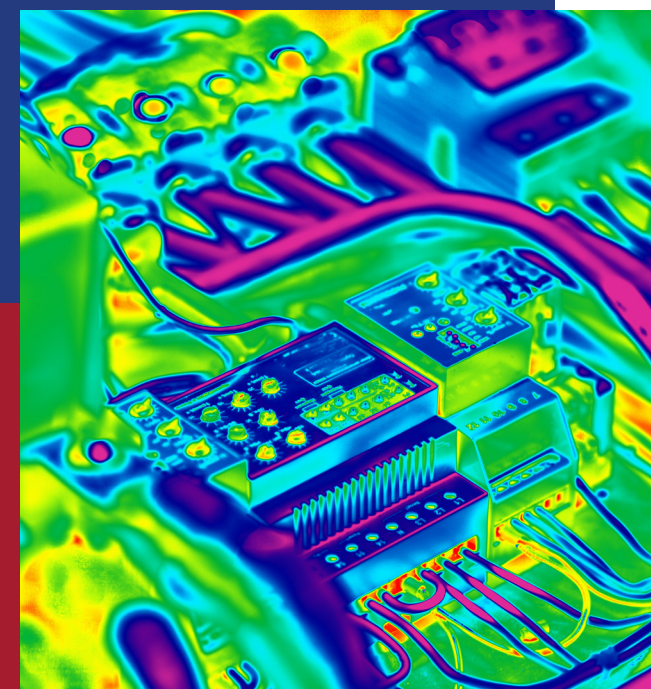

8303 Thora Ln, Spring, TX 77379
713.466.7696 | info@w-industries.com

W-Industries - Louisiana Corporate Office

7616 Johnston Street, Maurice, LA 70555
337.993.7425 | info@w-industries.com

W-Industries - Lake Charles

109 N Cities Service Hwy, Sulphur, LA 70663
337.625.8333 | info@w-industries.com

Critical Power Solutions

W-INDUSTRIES
CRITICAL POWER SOLUTIONS

UPS/Critical Power Systems

- **Design and Consultation** – As with all of our offerings, the Critical Power Group can provide service at every phase of UPS equipment lifecycle.
- **Installation** – We have the expertise and resources to handle installations of any size.
- **Preventative Maintenance** – Our preventative maintenance programs give you the confidence you need in your back up and critical power systems.
- **Service** – Whether it is maintaining your out of warranty units or supervising third party technicians, W-Industries can manage your service intervals to minimize impact to your production.

Batteries

- **Design** – W-Industries has the engineering support to assist in the battery design for your application.
- **Installation** – Our professional technicians can deliver quality and reliable installations, from new systems to system upgrades and battery replacement.
- **Preventative Maintenance** – Our Critical Power Solutions Group can develop a preventative maintenance program to ensure optimal protection of assets and increase life expectancy of equipment.
- **Capacity Testing** – W-Industries has the equipment and expertise to ensure that your system has the required energy to sustain the load of your critical power system.
- **Emergency Service** – W-Industries provides 24/7 troubleshooting and on-site emergency services.

Our Solutions

Our full scopes of solutions, from concept to project commissioning, have been proven in a broad range of industries:

- Oil and Gas
- Petrochemical
- Refining
- Power generation
- Pipelines
