

About Us

The Industrial Automation BU within Technology Solutions is committed to producing high-quality products and services at a superior value for our customers with a strategy focus on digitalization, Industry 4.0 Today, Industry 5.0 Tomorrow.

We are developing a custom industrial automation and controls solutions that will meet and exceed our client's expectations. Focusing on Artificial Intelligence, Robotics, Vision Systems, Energy Management, Cybersecurity and Industry 4.0.

Industrial Automation Offer

Our Company Capabilities, and our large experience in the Manufacturing Market Segment position us as an excellent partner to support our client's operations:

- Electrical Systems
- PLC and Software Controls Systems
- Robotic Cells
- Machine Automation
- Special Systems and Industry 4.0
- Power Generation and EMS

INNOVATING EFFICIENT SYSTEMS FOR A SUSTAINABLE FUTURE

We design cutting-edge industrial automation systems that help our customers optimize resource usage, lower environmental impact, and strengthen the communities where they live and operate.

Machine Vision

Machine vision replaces manual visual inspection by using advanced cameras and intelligent software to capture, analyze, and interpret images with exceptional speed and accuracy. It delivers consistent, data-driven decisions for controlling or evaluating parts, products, and processes.

- Automates manual steps and processes
- One camera can replace multiple sensors, simplifying system design.
- Boosts production speed and throughput with faster cycle times
- Improves product quality
- Reduces labor demands by minimizing manual testing and inspection

Robotic Cell Systems

Programmable mechanical systems designed to automatically perform production tasks in industrial environments.

- Automates manual steps and processes for greater efficiency
- Improves quality and consistency across operations
- Reduces safety risks
- Increase overall productivity through reliable automation
- Speeds up manufacturing processes with reduced cycle times

appointment** to tour
any of our facilities!

The Portfolio

- Engineering Design
- Soft Development, PLC, HMI, SCADA, MES
- Electrical Panel Shop UL certified
- Mechanical Equipment Fabrication
- E-Buildings
- Robotic Cells
- Vision Systems
- MCC-SWG
- Measurement and Instrumentation
- Energy Management Systems

Automation Solutions

It's any information technology that is designed to control the work of machines. Many modern machines have some form of computer control built into them.

- Automates manual steps and processes
- Reduce maintenance costs
- Reduce safety risk to switch hazard task done by human to robots
- Increase productivity

A COMPLETE ONE STOP SHOP

As companies face greater challenges, W-Industries underscores the **importance of continuity** and the **efficiencies in our business practices, providing seamless offerings** backed by a **fully-integrated team.**
